

Jabra Elite Active 8 claim verification

1. Summary

FORCE Technology has performed a claim verification test which contributes towards substantiating the following claim. The claim wording is created by GN Audio A/S, for their newly released ear buds, Jabra Elite Active 8.

Details of associated disclaimers are given in Section 3.

Product	Claim
Jabra Elite Active 8	"The world's toughest earbuds"

2. Method

Jabra Elite Active 8 was tested against seven competing products from the market leading manufacturers in the business. The competitors are making up 80 % of the market. The competing products were selected by GN Audio A/S (Jabra is a subsidiary of GN Audio A/S).

Three samples of each product were exposed to a number of environmental tests combined with functional tests. The function testing parameters were selected by GN Audio A/S. The tests are described in FORCE Technology test report 123-21553-1 to be issued.

The tests which were used as base for the claim were:

- **Branch 1**
 - Loose load vibration (bounce)
 - Temperature shock
 - Temperature change
 - Humidity exposure (damp heat, steady state)
 - Salt mist
 - Drop
 - Charging
- **Branch 2**
 - IP 54 (cradle)
 - IP 68 (ear buds)
- **Branch 3**
 - HACT (Highly Accelerated Corrosion Test)
- **Branch 4**
 - Mechanical tests

Each branch was given an equal weight of 25 %. Weightings are mutually agreed by Jabra and FORCE Technology.

Based on these measures, an overall score was calculated for the weighted parameters.

Jabra Elite Active 8 scored generally higher than any of the other tested products.

FORCE Technology is not responsible for the selection of the included products only for the environmental tests themselves and the corresponding calculation of the scores that are obtained from the testing.

3. Disclaimers

This claim relates to the environmental robustness tests described in Section 2 only.

4. Document validation

FORCE Technology confirms that the Jabra Elite Active 8 received a generally higher score than any of the other tested products thus substantiating the claim.
